

Busse Gardens 2015 Plant Catalog

Genus: Aconitum	Zones 3 to 8	  	
Aconitum cammarum Bi-color			\$9
4-5' stems bearing white and blue flowers in summer.			
Aconitum carmichaelii Arendsii			\$8
3-4' spikes bearing dark violet hooded flowers in Sept.-Oct.			
Aconitum septentrionale Ivorine			\$9
24-30" stems bear cream-white pyramids of hooded flowers in late summer.			
Aconitum napellus			\$8
Dark indigo blue flower helmets on 36" plants. June-Jul. Easy to grow.			
Genus: Actaea	Zone: Varies by cultivar	 	
Actaea Pink Spike			\$18
This recent introduction combines the highly prized dark bronze-black foliage of the most striking Actaea cultivars with soft pink flowers. The 4-5' plumes are causing a sensation in shady gardens everywhere. Needs well drained soil and part shade. In warmer zones, it should be in full shade.			
Actaea rubra			\$9
Unusual plant with spikes of clustered scarlet berries carried well above the clumps of ferny foliage. For the past few years we have been unable to find a source for this plant. We are happy to have a local Minnesota grower now providing them for us.			
Actaea ramosa Atropurpurea			\$11
3-4' distinctive creamy-white wands. Decorative purplish tints on stems and foliage. Comes up green; color enhanced with some sun. Aug.-Oct.			
Actaea ramosa Brunette			\$16
4-5'. Fragrant creamy-white to pale pink wands are in sharp contrast to the exotic black-purple lacy foliage and stems. Avoid disturbing once established. Aug.-Sept.			
Genus: Agastache	Zones 5 to 9		
Agastache Blue Fortune			\$8
Purplish-blue flower spikes on very fragrant foliage. Long mid- to late-summer bloom. Compact habit; 2-3'.			
Genus: Ajuga	Zones 3 to 10	  	
Ajuga Chocolate Chip			\$8
This unusual Ajuga has rich chocolate colored, small, narrow leaves. Blue flowers. Very low growing. Choice for small spaces or underplanting.			
Ajuga reptans Burgundy Glow			\$8
Our favorite of the Ajugas due to its unique coloration. It has green and purple, to be sure, but with an overlay of white giving the leaves a frosted look. Very attractive and with nice 6" plumes of blue flowers in spring.			
Genus: Alchemilla	Zones 3 to 8	  	
Alchemilla mollis			\$9
The best all around landscape plant of the Lady's Mantles. Grayish-green foliage. Grows rapidly to reach 18 - 24".			
Alchemilla alpina			\$8
6" dwarf form. Dark green leaves with thin white edge. Greenish yellow flowers in late spring.			
Genus: Allium	Zones 3 to 9	 	
Allium senescens Glaucum			\$8
Cork-screw leaves that stay green all season. Clumps to 6" tall. Pink flowers in late summer, early fall.			
Genus: Amsonia	Zones 3 to 9	 	
Amsonia Blue Ice			\$9
Blue flower buds in late spring, opening to star shaped flowers. Larger than the species A. tabernaemontana. The compact shrub-like plant with clumping foliage turns a rich shade of yellow in fall.			

Amsonia hubrichtii \$8

Sky-blue flowers in June-July, very fine thread-like foliage develops nice fall color. 36".

Amsonia tabernaemontana \$9

Pale blue flowers top this 3 foot native. Produces many stems with elliptic or lance-shaped dark green leaves, each topped with a dense panicle of flowers.

Genus: Anemone Zone: Varies by cultivar  

Anemone sylvestris \$8

Of the Anemones that we carry, this species is the only spring-summer bloomer. Its common name arises from the fact that in some zones, the white flowers can emerge even when there is still snow on the ground. Fragrant, nodding white flowers of good size, set off by yellow stamens. 12 - 15".

Genus: Aquilegia Zones 3 to 8  

Aquilegia canadensis \$8

Our native Minnesota Species. Very hardy with dainty pinkish-red and yellow blossoms May to July. Naturalizes readily. To 36".

Genus: Arisaema Zones 3 to 8  

Arisaema triphyllum \$9

The triphyllum species is the most hardy and the only one found natively here in Minnesota. The leaves resemble those of Trillium. Commercially propagated; not harvested from the wild. 12 - 36", depending much on conditions.

Genus: Aruncus Zones 3 to 7   

Aruncus dioicus \$8

White plumes 3-6' tall. Cut-leafed foliage 1-3' tall. In many ways this Goat's Beard looks like a giant Astilbe, but it can be used in areas that are much sunnier and not as reliably moist. Jun-Aug.

Aruncus aethusifolius \$8

10-14" spikes over 6" - 8" fern-like foliage. Wonderful for rock garden or front of border.

Genus: Asarum Zones 4 to 8  

Asarum europaeum \$12

Splendid glossy, deep rich green kidney-shaped leaves 2-3" wide. Leaves have very heavy substance.

Asarum canadense \$9

6-12" tall with leaves 4-6" long. Fast spreading. Satiny broadly heart-shaped leaves. Small reddish flowers.

Genus: Asclepias Zones 4 to 9 

Asclepias tuberosa \$8

This is the native species usually associated with the common name. Heads of bright orange all summer. Avoid disturbing once established. Sandy location.

Asclepias tuberosa Hello Yellow \$9

For a nice variation on the orange species *Asclepias tuberosa*, try this cultivar selected for its yellow flowers. The butterflies still love it. Like the species, it likes well drained soil and provides about three months of late summer blooms. Deadhead to promote rebloom.

Asclepias incarnata \$8

Valuable plant for moist to wet soils. Attractive clumps of dusty pink panicles on 5' stalks in July. Although it likes moisture, our natural patch did well in soil of average moisture depending only on natural rainfall.

Asclepias incarnata Ice Ballet \$8

Pure white flowers in June-Aug. Grows to 40" in moist to wet soil. Makes a good cut flower.

Asclepias syriaca \$8

Common milkweed.

Genus: Aster Zones 3 to 8 

Aster novae-angliae Alma Potschke \$7

Fall blooming, vigorously branching cultivar with salmon rose flowers; reaches 36".

Aster novae-angliae Harrington's Pink \$7

Clean salmon-pink daisy-like flowers in Sept.-Oct. on plants that can reach 5'.

Aster novae-angliae Purple Dome	\$8
A favorite Aster, the Purple Dome has a multitude of deep purple flowers and keeps a compact habit. It is also mildew resistant.	
Aster novae-angliae Wedding Lace	\$8
Attractive white flowers in September on 48" stems.	
Aster Dumosus Group Alert	\$8
One of the best small reds. Ruby red flowers on compact 10" plant.	
Aster novi-belgii Marie Ballard	\$7
Lovely blue flowers cover this 30" plant in fall.	

Genus: Astilbe	Zones 3 to 8	 	
Astilbe japonica Deutschland			\$8
White spires on 30" stems early season.			
Astilbe japonica Montgomery			\$8
Deep orange-red flowers in June. To 24".			
Astilbe japonica Peach Blossom			\$8
2' medium pink spikes in June.			
Astilbe japonica Rheinland			\$8
24" clear rose spikes. Heavy blooming and very early.			
Astilbe simplicifolia Sprite			\$8
PPA Perennial plant of the year in 1994. 12" light pink arching plumes over nice dark lacy foliage.			
Astilbe arendsii Fanal			\$8
Elegant lacy bronze foliage with plumes of the deepest blood red color. Early bloomer.			
Astilbe chinensis Maggie Daley			\$8
Bright lavender- purple plumes are dense and fuzzy. The shiny, dark foliage is attractive even when the plant is not in bloom. Height is 28"			
Astilbe chinensis Purple Candles (Purpurkerze)			\$8
Reddish-purple dense narrow plumes late in the season form tall candle-like spires. 36".			
Astilbe chinensis Visions			\$8
Fragrant, vibrant, raspberry-red, upright plumes. Compact grower with bronze-green foliage, 15" stems. One of our favorites.			
Astilbe chinensis Visions in Pink	PP11860		\$9
Like its cousin, 'Visions', this Astilbe has thick upright plumes on sturdy stems. It is a robust grower and handles dry gardens better than most Astilbes. Great pink color on 18-20" plants.			

Genus: Aстранtia	Zones 4 to 9	  	
Astrantia Moulin Rouge			\$12
This patented Astrantia is one of the nicest we've seen. The color is darker than the others and is carried in the petals and into the centers of the flowers where it is mixed with white. The dark purple-red color is deeper at the petal tips. Exotic, yet easy to grow, this cultivar reaches only 16-18" so it can be placed much closer to the front of the border than most other Astrantias. Long-flowering, from June through September.			

Genus: Athyrium	Zone: Varies by cultivar	 	
Athyrium niponicum Pictum			\$8
The original Athyrium, from which all the new colored cultivars started. Still a nice colorful fern with soft gray, red and green flushed fronds. Light to moderate shade. Deciduous. 12-18".			

Genus: Baptisia	Zone: Varies by cultivar	 	
Baptisia Purple Smoke			\$11
This hybrid was introduced in 1996. It is a vigorous cultivar with charcoal green stems, darker than B. australis, and giant flower heads of dusty purple. Reaches 4'.			
Baptisia Twilite (Twilite Prairieblues)			\$12
This extremely robust and vigorous selection of Baptisia, introduced by the Chicago Botanic Garden, features violet-purple flowers highlighted with a yellow keel. This cross between b. australis and b. sphaerocarpa is a Baptisia on steroids. It can reach 3 - 5' in height, yet is tough enough to stand up to strong winds. A must-have item for every collection of unique perennials.			

Baptisia australis \$9
 This perennial is a spectacular specimen in the garden and is outstanding as a mass planting. When not in bloom, its thick bushy blue-green foliage is cool and pleasing to the eye, then in May and June, it will become covered with blue pea-like flowers, eventually forming seed pods that are used in dried arrangements. It has a large taproot which makes it drought tolerant but also makes it more difficult to move. 3-5' plant with blue flowers on racemes 12" long.

Baptisia sphaerocarpa \$11
 Another species of Baptisia, this one is grown for its bright, buttery-yellow flowers in July. Like the others, it is drought tolerant species. 36".

Genus: Calamagrostis Zones 4 to 9 
Calamagrostis acutiflora Karl Foerster \$8

4-5' strict upright habit. Fluffy flowers from June-Sept. Good winter appearance. Perennial Plant Association "Perennial Plant of the Year" in 2001.

Calamagrostis brachytricha \$8
 A wonderful light and airy grass featured as an "Editor's Pick" by Garden Gate Magazine. Pink and purple inflorescences in Sept. Clumps to 24" wide and 24" high.

Genus: Callirhoe Zones 4 to 6 
Callirhoe involucrata \$9

Also commonly known as Wine Cups due to the bright carmine-rose cup-shaped flowers with white centers that are borne on numerous stems from late spring to mid-summer. 7-8".

Genus: Campanula Zones 4 to 8  
Campanula Sarastro \$9

A Campanula punctata hybrid reaches 18" in the foliage with huge 2 1/2" violet blue flowers on well-branched stems. Spreads moderately, but does not run like some of the species (like 'Cherry Bells'). From Sarastro nursery in Austria. Great for containers and re-blooms when cut back.

Campanula garganica Dickson's Gold \$8
 Low mounds of bright golden scalloped foliage contrasted with lavender-blue flowers.

Campanula punctata Cherry Bells \$8
 Pendulous, cherry red tubular flowers are neatly edged in white and dangle along the stem. Strong spreading habit which may need some pulling of extra growth or artificial containment. Summer flowering. 24-30".

Genus: Chelone Zones 3 to 8  
Chelone obliqua \$8

2-3' stems bearing pink flowers in Aug.-Sept.

Chelone lyonii Hot Lips \$8
 Bronze-green foliage turning bright deep green topped with rose colored flowers in July-Aug. 24-36".

Chelone glabra \$9
 Pale pinkish-white turtle head flowers on 4" stems in Aug.-Sept.

Genus: Chrysanthemum Zone: Varies by cultivar 
Chrysanthemum Autumn Fire \$7

Produces 4" fully double decorative glowing burnt orange flowers on willowy-stiff stems. An extremely vigorous and uniform plant, grows 20 - 24" high and 30" wide. Blooms mid-Sept.

Chrysanthemum Baby Tears \$7
 A nice, hardy, button mum in white. Pure as a baby's tears. These 12" tall rounded plants work well in a container. Blooms begin soon after the beginning of September and last until frost.

Chrysanthemum Betty Lou \$7
 Sometimes referred to as a 'shrub mum' due to its size and characteristics. In the first year it may reach only 10-12" high and 30" in diameter, but the second year, it will be 30 - 36" high and 36" across. It presents a wonderful opportunity to create a striking herbaceous hedge. Profuse red button flowers average 2 1/2" in diameter. Flowers cover the plant from early August through frost. One of the most winter hardy mums from the University of Minnesota.

Chrysanthemum Bronze Giant \$7
 Large 5" bronze flowers blooming around the third week of September. Decorative and great for cutting.

Chrysanthemum Burnt Copper \$7
 U of M Mum very distinctive for its showy display of orangy-bronze fully double, pompon flowers on a very wide 20" high plant. Strong upright growth with very dark green foliage. Blooms early September.

Chrysanthemum Cameo	\$7
We haven't seen this one, but our Minnesota supplier says that it is an excellent true pink with 2" blossoms on a 15" cushion style plant. Should be nice. Blooms mid-September.	
Chrysanthemum Centennial Sun	\$7
A bright array of color and unusual resistance to adverse weather made this cultivar the U of M's selection for introduction for 1985, in honor of the Minnesota Agricultural Experiment Station's 100th anniversary. From late August until frost, produces a prolific canopy of 1", fully double, bright golden yellow, formal flowers on uniform mounded plants 16-18 inches high and 25-28 inches wide. Also an excellent cut flower.	
Chrysanthemum Centerpiece	\$7
Large 4" quill type rose-lavender flowers with gold centers. Blooms show frost resistance. Stiff stems make good cut flowers. Well adapted to containers. Blooms in Aug. - Sept. 24".	
Chrysanthemum Clara Curtis	\$7
One of the really old-fashioned mums that are the most hardy. Should survive in zone 3 under normal conditions. 18-24" stems bear pink daisy-like flowers from Aug.-Oct. Spreading garden mum.	
Chrysanthemum Doilette	\$7
This is one of the few multi-colored mums. It has a bronze spoon - center - with red tips. See it in bloom and you'll buy it. Blooms late september.	
Chrysanthemum Gold Country	\$7
A U of M Mum with golden-yellow fully double 4 1/2" incurve decorative flowers. About 20" high and wide. Showy in the garden and good for cutting. Blooms around the second week of September.	
Chrysanthemum Golden Star	\$7
A U of M mum rich yellow frost-resistant 3 1/2" single flowers, spoon-petaled, covering mounds about 13" high and 20" wide. Starts flowering about the third week of August and will develop repeated flushes of flowers until the killing frost. Another star from the U of M.	
Chrysanthemum Grandchild	\$7
A sweet orchid-lavender flower with rich purple center. Full pompon type flowers are really beautiful. Blooms mid-September. 16" tall.	
Chrysanthemum Grape Glow	\$7
Radiates with bright rosy purple 3 1/2" decorative flowers whose petals have a silver reverse. Stocky 15 - 18" plants bloom mid-August - Sept. Minnesota Mum from 1988.	
Chrysanthemum Lemonsota	\$7
This 12 - 14" cushion type Minnesota Mum will be covered with 1" lemon-yellow pompon flowers with darker centers and delicately fringed flowers. Blooms around the second week of September.	
Chrysanthemum Maroon Pride	\$7
Displays 3 - 3 1/2" rich dark red, slow fading, fully double, flat decorative flowers atop medium height, uniformly mounded plants. A Minnesota Mum. Flowering in the Twin Cities usually begins the last week of August, peaks within several weeks, and continues to produce new blooms thereafter. 18" high, 28" wide plants.	
Chrysanthemum Matchsticks	\$7
Medium sized red petals quills shaped. Plants can reach height of 16 inches.	
Chrysanthemum Mellow Moon	\$7
Cream colored 5" semi-incurved fully double decorative flowers that maintain their color in cold weather. Stiff-stemmed plants have dense foliage of rich green. Unusually compact for a large flowering form. 16 - 18" high, 22" wide. Starts blooming mid-Sept.	
Chrysanthemum Minnautumn	\$7
We welcome autumn with Minnesota Mums and this one will form a spreading cushion of intense orange-red 2" flowers. The plant can easily spread to 20" in diameter and is about 15" tall, blooming in early September.	
Chrysanthemum Minngopher	\$7
Mid-September blooming Minnesota Mum with dark red double blooms. Nicely mounded plant.	
Chrysanthemum Minnpink	\$7
Rose pink flat 3" decorative flowers Aug. - Sept. on Lower growing plants.	
Chrysanthemum Minnqueen	\$7
A U of M mum with vigorous plant with 3" flat decorative bright rose-pink flowers about mid-September. The plant is uniformly 12" tall and spreads to 24".	
Chrysanthemum Minnruby	\$7
An excellent U of M mum that combines hardiness with good bloom, producing many 2 1/4" ruby red flowers that are good for cutting. A 12" high, 20" wide cushion form.	
Chrysanthemum Minnwhite	\$7
A U of M mum with a vigorous cushion form that will be completely covered with hundreds of pure white 2" fully double decorative flowers. Cream centers mature to white. 12" tall plants bloom early Sept..	

Chrysanthemum Minnyellow	\$7
A U of M with hundreds of bright 2" lemon-yellow flowers will cover this mounded plant beginning in early September and continuing through frost. About 15" tall.	
Chrysanthemum Pat Lehman	\$7
Sparkling salmon-pink flowers with peach-colored centers. Flowers are large and fluffy. A really nice mum blooming at the end of September.	
Chrysanthemum Peach Centerpiece	\$7
A vigorous, uniform plant that usually begins blooming in the first week of September and continues until frost. Produces a thick canopy of 4" peach-colored, single, quill flowers with gold centers on plants 20" wide and 24 - 26" high. Dark green foliage, long stems, and an upright plant habit make 'Peach Centerpiece' a good cut flower.	
Chrysanthemum Rose Blush	\$7
A 1993 decorative mum from the U of M breeding program. Flower color starts out as mauve, then changes as the flower ages, giving an attractive effect. Noted for its profusion of blooms from the beginning of August through frost. 13 - 17" high, forming a clump 14 - 18".	
Chrysanthemum Rosy Glow	\$7
A U of M mum that displays a full canopy of 4"-, deep rosy-pink, incurved, double flowers with yellow centers atop stocky, spreading plants 15" high and 18" wide. Flowering usually begins in early September in the Twin Cities area.	
Chrysanthemum Sesquicentennial Sun	\$7
A U of M mum with a brilliant bouquet of frost-tolerant flowers and its "Golden Gopher" like color, 'Sesquicentennial Sun' was selected by the University as its floral contribution celebrating 150 years of achievement for Minnesota. It produces a profuse flower display of fully double, pompon flowers up to 2" in size on uniformly mounded plants 12 - 18" high and 20 - 23" wide.	
Chrysanthemum Snowscape	\$7
One of our favorites. Semi-double decorative mum. The bi-color petals of white with lavender-purple tips make the flowers look similar to Dahlias. Blooms early August through frost. A Minnesota Mum, so it has good hardiness.	
Chrysanthemum Snowsota	\$7
Produces an informally mounded plant topped by 1 1/2", full, white, long-lasting pompon flowers with light yellow centers that fade to white. 15" high, 24" wide plants. Blooming in the Twin Cities usually begins the last week of August.	
Chrysanthemum Zonta	\$7
A U of M mum with unique apricot-bronze or orange-bronze 2 1/2" pompon type flowers on medium sized plants in September. Plants are about 16" high.	
Chrysanthemum weyrichii Pink Bomb	\$7
Single pale pink flowers on 6-12" stems from July-Oct.	
Chrysanthemum weyrichii White Bomb	\$7
Single white flowers on 6-12" stems from July-Oct. Thick fleshy foliage.	

Genus: Convallaria	Zones 2 to 7	 
Convallaria majalis		\$8
This is the old fashioned creamy-white blooming form that is found in country gardens everywhere. Tough as can be and an excellent ground cover for shade.		
Convallaria majalis Rosea		\$8
We have now had the pink form of Lily of the Valley for a couple of years. The pots we sell will have multiple pips and are likely to bloom the first year in your garden. Of course, there's no guarantee as some plants just take longer than others, but we did see some of them bloom even last year. 6-8".		

Genus: Coreopsis	Zones 3 to 9	
Coreopsis Moonbeam		\$8
Wiry herbaceous bushes reaching 15-18" with pale lemon flowers from June until frost. PPA Perennial Plant of the Year in 1992.		
Coreopsis verticillata Zagreb		\$8
Clear gold-yellow flowers all summer. Compact habit, fern-like foliage on a 15" plant. Similar to 'Moonbeam' with the main difference being that the flowers are more gold whereas those of 'Moonbeam' are more of a lemon yellow.		
Coreopsis grandiflora Domino		\$8
Compact plant, bicolor yellow flowers with reddish brown blotches in the center.		
Coreopsis grandiflora Early Sunrise		\$8
Award-winning double form; blooms bright gold all summer on 18-24" stems over dark green basal mounds.		
Coreopsis tripteris		\$9
Great Plains native. This one is different. 6-9' plants, highly branched. 2" yellow flowers turning purplish.		

Genus: Delosperma	Zones 4/5 to 8		
Delosperma nubiganum			\$8
This species of Ice Plant, is a fast growing, mat forming succulent that makes a good ground cover. Can also be used at walls and rock gardens where it will naturally cascade. Needs little care and blooms bright yellow in the spring. Its succulent foliage is attractive all season. Turns a bronzy-red color as winter approaches. As a succulent, it needs sun and a very well drained location. Does not ship in summer.			
Genus: Delphinium	Zones 3 to 7		
Delphinium grandiflorum Blue Butterfly			\$8
A compact 12-18" dwarf form with flowers of ultramarine blue. The stems tend to branch nicely providing an open, airy look. We sell lots of these each year after people see them in bloom at our open house events. Excellent in front of the border. They tend to re-seed to produce an ongoing supply of plants but are by no means invasive.			
Genus: Dianthus	Zones 4 to 8		
Dianthus grantianopolitanus Tiny Rubies			\$8
Double rose-red flowers on a small plant to 4".			
Dianthus arenarius f. nanus Little Maiden			\$8
Very compact mound with narrow bluish green foliage, unique white fringed flowers bloom mid summer into fall. Very fragrant.			
Genus: Dicentra	Zone: Varies by cultivar	 	
Dicentra spectabilis Gold Heart			\$12
A brilliant and unusual spring beauty that shines like a beacon with its arching sprays of pink flowers over bright gold foliage. Excellent with burgundy Heucheras.			
Genus: Dictamnus	Zones 3 to 7	 	
Dictamnus albus			\$10
Mauve-pink flowers late spring, early summer. Excellent specimen plant. These plants are from a Minnesota seed strain and will show some variation with respect to how pink the flowers are and how dark and prominent the veining is.			
Genus: Echinacea	Zone: Varies by cultivar		
Echinacea Amazing Dream	PPAF		\$12
A dream in the garden with its dense habit, amazing number of blooms and long season of bloom. Flowers are a deep pink.			
Echinacea Harvest Moon	PP17652		\$12
We tried this Echinacea from the Big Sky series last year and we liked it a lot, so we ordered a good supply for the 2007 season. Even so, we expect to sell out in the spring, so don't wait too long. The cone is golden orange and the petals are bright golden with just a touch of orange. It really does remind us of the color of the harvest moon. Compact plants should reach 24 - 30".			
Echinacea Summer Sky	PP18783		\$12
This is one of the new additions from the Proven Winners "Big Sky" series. Tough and drought tolerant, it has bright orange blooms. 36 - 42" high stems on sturdy plants.			
Echinacea Sundown	PP17658		\$12
Fragrant, orange flowers with a brown cone and overlapping petals.			
Echinacea Sunrise	PP16235		\$12
From the breeding program of ItSaul Plants comes 'Sunrise' (PPAF), a statuesque beauty with citron yellow, daisy-like blooms and a central cone that starts out green and turns to gold. The color is a big improvement over E. paradoxa and the stems are stout and sturdy, so there's no need to stake and the cut flowers are great. 30 - 36" high with flowers that can reach 5" across.			
Echinacea Tomato Soup	PP19427		\$11
Warm, tomato-red flowers to 5" wide stunned our nursery visitors! A real treat to 32" tall and nearly as wide covered with flowers till frost! Plants are well branched and show excellent vigor. A natural pairing with E. 'Mac and Cheese'.			
Echinacea Twilight	PP17651		\$12
Also from Proven Winners "Big Sky" series, this coneflower has a large central cone of burnt-red surrounded by rose petals. Like the others in the series, it is heat and humidity tolerant and sturdy. This most likely results from the Echinacea paradoxa part of the hybrid. Fragrant and butterfly friendly.			
Echinacea purpurea Butterfly Kisses	PPAF		\$11
Compact and sturdy habit with bright pink double pom-pom type flowers. This plant is very well branched and nicely mounded. It has very strong flower stems.			

Echinacea purpurea Hot Papaya \$12

This hybrid from the Netherlands has a pom-pom center similar to Pink Poodle, but with red-orange flowers. And it's said to be very fragrant, though this is the first year with we've offered it, so we haven't experienced that ourselves. 3" flowers mid through late summer like most of its relatives. Lasts about 2 weeks as a cut flower.

Echinacea purpurea Kim's Knee High \$10

Dwarf version of purple cone flower. Clear pink, drooping flexed flower petals on a plant that reaches only 18-24"

Echinacea purpurea Magnus \$8

3-4' tall with rose-pink non-drooping petals. 1998 Perennial Plant of the Year.

Echinacea purpurea Ruby Giant \$8

This is the new Echinacea everyone is waiting for. It comes from the same stock plants as the seed strain 'Rubinstern', but is tissue culture propagated to guarantee consistently healthy and beautiful plants. Huge 7" recurved flowers of pure rich red-purple color. The best Echinacea available today.

Echinacea pallida \$8

Pale purple with narrow downward arching 1 1/2 - 3" petals on 3-4' stems in summer. Extremely graceful. Plant in rich, well-drained soil. Some think this plant looks sickly, but the more you see it, the more you appreciate its subtlety and grace. A native prairie plant well worth adding.

Genus: Echinops Zones 4 to 8 

Echinops sphaerocephalus Arctic Glow \$7

This unique new white flowering form grows to 32" and has large bell-shaped blooms over silvery-green foliage. Distinctive mahogany-red stems.

Genus: Epimedium Zones 4 to 8  

Epimedium versicolor (x) Sulphureum \$10

8-10" plant with flowers of sulfur yellow. Excellent foliage.

Epimedium youngianum (x) Roseum \$8

Pink-violet form. 6" plant with 12" flower stems. Drought tolerant.

Epimedium cantabrigensis \$10

Semi-evergreen form with small burnt orange flowers on 10-12" foliage.

Epimedium grandiflorum Lilafee \$9

Lavender-violet, floriferous and vigorous. Drought tolerant. 12".

Genus: Eupatorium Zone: Varies by cultivar  

Eupatorium maculatum \$7

Large clusters of fuzzy, pink flowers appear late in the season atop 4-5' stems. Naturally a wetland plant, but can adopt to garden soils.

Eupatorium maculatum Atropurpureum \$8

A cousin of the Joe Pye Weeds, with purple stems and leaf veins. Lavender-purple flowers. Grows to 6'.

Genus: Euphorbia Zone: Varies by cultivar 

Euphorbia polychroma First Blush PPAF \$7

A new polychroma cultivar with a low, mounding habit and foliage with spectacular variegation. Light green leaves have creamy-white margins and a flush of rose-pink along the edges. In spring rose-colored buds are surrounded by brilliant yellow bracts. 12" tall.

Euphorbia palustris \$8

Robust color for moist to wet sites and in shallow water, but tolerates dry areas too. 3' upright willow-leafed stems bear clusters of dark yellow flowers May-June.

Genus: Filipendula Zones 3 to 8  

Filipendula Kahome \$9

Very attractive, long lasting pink flowers bloom June-Sept on plants to only 15".

Filipendula rubra Venusta \$9

This meadowsweet bears rose-pink fragrant flowers on 4-6' stalks.

Genus: Galium Zones 4 to 8  

Galium odoratum \$8

Grows to only a few inches tall; great for the rock garden. Starry white flowers. An herb used to flavor wine.

Genus: Geranium Zone: Varies by cultivar  

Geranium Brookside \$9

Promoted as an improved 'Johnson's Blue'. Very floriferous. Rich sapphire blue flowers with a pale center. Forms a wide clump former the first year; attractive foliage. 24".

Geranium Patricia \$8

Big, bold dark green foliage with bright pink-magenta flowers with a black star-shaped center. Long blooming on 2-3' plants. Stunning.

Geranium Rozanne PP12175 \$12

From Blooms of Bressingham comes this free-flowering Geranium. Large 2 1/2" flowers of violet blue are carried above mounds of deep green foliage, lightly marbled with chartreuse. Terrific impact from June- Oct. One plant can cover a 2-3' area in a single season. Also great for hanging baskets or flowing out of containers. 18-20" tall.

Geranium Tiny Monster \$11

This new hybrid is sterile, so it blooms on and on, well into late summer with large violet-purple flowers. It is quick spreading and has foliage that remains attractive throughout the season. Makes a good groundcover for sunny areas. Height is 16-18".

Geranium sanguineum New Hampshire Purple \$8

A shade darker than the species. Larger blooms with more substance. Flowers all summer. Clumps to 24".

Geranium sanguineum var. Striatum \$8

Creeping carpet-like habit. Pink flowers with crimson vein. 8-10". Long-blooming selection.

Geranium cinereum Ballerina \$9

Large lilac-pink flowers with purple-red centers all summer on a petite 4" plant with glaucous leaves.

Geranium cantabrigiense Biokovo \$8

White, tinged pink, flowers high above the foliage in June-July on 5-6" plants. Turns red in autumn.

Geranium cantabrigiense Karmina \$8

Dark pink flowers, slightly more dwarf than G. 'Biokovo'.

Geranium macrorrhizum Bevan's Variety \$8

Scented foliage, flowering profusely in bright magenta. Makes a great groundcover. 8-10".

Geranium pratense Dark Reiter \$9

This dark foliage plant has a nice short mounded habit and produces bright lilac-blue flowers in the spring. Cut back to encourage a second flush of blooms. Somewhat slow growing, so plant a few together or use it as a specimen in the rock garden. Deer resistant. Plant in full sun to part shade and well-drained soil.

Geranium pratense Hocus Pocus \$9

This cultivar has been around for awhile but I think this is the first time we've offered it. From Holland, it produces a multitude of 2" light purple flowers with white centers and black anthers in late spring and lasting through summer. Fairly compact, but still reaches about 24" in height and spread. Leaves are dark chocolatey-purple with bronze highlights in spring becoming dark green with dark edges in the summer.

Geranium magnificum \$9

Large, rough, deeply indented leaves. Bears violet-blue flowers in early summer. 18-24".

Genus: Geum Zones 3 to 8  

Geum triflorum \$9

Nodding pink flowers in early spring followed by a most unique feather-duster or smoke-like head made up of the long tails attached to each seed.

Genus: Helenium Zones 3 to 9 

Helenium Flammenspiel \$9

40-42" brown-yellow flower heads in late summer.

Helenium Rubinzweg \$8

'Rubinzweg' means is loosely translated as "Red Gnome" or "Red Dwarf". While not quite a dwarf, it is a more compact form than some. Yellow and brown flower centers surrounded by burnt red petals. compact grower to 24 - 30".

Helenium Sahins Early Flowerer \$8

Deep red flowers streaked with orange and yellow with a brown code. Tall stems good for cutting.

Genus: Heliopsis

Zones 3 to 9

**Heliopsis helianthoides Summer Nights**

\$8

This new Heliopsis has golden single yellow daisy-like blooms with mahogany-brown centers. Petals tinted red at centers when young, turning all yellow as they mature. The stems and of this cultivar are tinted purple and the leaves may have a red blush. Blooms for up to 8 weeks beginning in mid-summer when many other flowers are fading.

Heliopsis helianthoides Summer Sun

\$8

Masses of golden yellow double flowers over a long period in summer. Good cut flower. To 48".

Genus: Hemerocallis

Zone: Varies by cultivar

**Hemerocallis Barbara Mitchell**

\$12

An almost perfect daylily. Pale lavender pink and nice celery green throat with consistent round ruffling. Perfect form. Best of the pink diploids. Long flowering and good branching. Mid-season re-bloomer. 20", 6" flowers. (Pierce '84)

Hemerocallis Big Bird

\$9

Named after the Sesame Street character, this daylily is, of course, bright yellow. And the flowers are the largest of any yellow form, reaching 7". Stems reach 34". The fragrant blooms will greet you from early to mid-season.

Hemerocallis Big Smile

\$9

The 'Big Smile' is obvious when you take a look at the flowers on this unique new introduction. The blooms are wonderful yellow with nice pink 'lip' margins. Happily, the margin is not so distinct that you have to think of a big open mouth every time you look at it. Flowers are held on 28" stems well above the 16" foliage. Regular deadheading provides bloom from June until mid August. Highly recommended.

Hemerocallis Bill Fall

\$8

A vibrant red 5-6" flower with a gold watermark and green throat. One of the brightest large flowered daylilies. Vigorous grower with almost woody branched scapes.

Hemerocallis Bitsy

\$8

A 2002 All-American Winner, one of the longest blooming, with tiny 2" yellow flowers. Starts blooming early and just keeps going. Tolerates extreme heat and cold. 12-20".

Hemerocallis Bright Sunset

\$8

Dusty burnt orange with deeper halo and yellow green throat. Very vigorous and very fragrant. Tetraploid, early, extended bloom. 36" plant; 6" flowers. (Rudolph).

Hemerocallis Chicago Apache

\$8

Intense scarlet red. Ruffled edges with a deeper tone. Extremely sunfast. Vigorous grower, healthy foliage, sturdy scapes. 30" stems, 5" blooms, late. Tetraploid. (Marsh-Klehm)

Hemerocallis Chicago Blackout

\$11

A 30" tetraploid daylily, we select this cultivar for its intense dark blackberry color. The midribs are reddish and the small eye is yellow-green. Mid-season bloomer.

Hemerocallis Custard Candy

\$9

Creamy yellow custard colored blooms with maroon eyes are more than 4" across. Flowers have ruffled edges and are on 24" stems. Strong growing tetraploid and winner of many awards. (Stamile, '89).

Hemerocallis Early Snow

\$9

Near white daylily. 7" flowers rich cream color with glowing yellow green throat. Ruffled petals open wide and flat. 4-5 way branched scapes.

Hemerocallis Edge Ahead

\$8

Lavender with deeper edge and lavender-purple eye. 28" high; 5.5 inch bloom. Mid-season rebloomer. Tetraploid. Sellers, 1993.

Hemerocallis El Desperado

\$11

A tetraploid with medium yellow flowers with wine-purple eyes and a wine-purple edging at the base of the center petals. Blooms are 4 1/2" on 28" stems. Late blooming.

Hemerocallis Eleonore

\$10

With all of the daylilies to choose from, it's hard to decide which ones to add and which ones to drop each year. So, like you, I look at the pictures and see which ones I like. This year, 'Eleonore' makes the cut for its color, shape and features. It's an early to mid-season bloomer with perfectly shaped lavender blue flowers with green throats. The inner petals are darker and nicely ruffled setting them off from the outer sepals. 28".

Hemerocallis Entrapment

\$8

This one is a super bloomer with 32 flowers per stem when mature. Large 6" blue-purple flowers with a yellow throat and wonderful ruffling, excellent rebloomer and destined to be one of the best. Height 20-25".

Hemerocallis Fooled Me

\$9

2005 AHS Stout medal winner, This well-formed daylily has golden 5.5" bloom with large red eye zone. Nice ruffling at the petal edges, which are slightly darker than the body. 24" stems. Early-Mid season. Hein, 1990.

Hemerocallis Frosted Vintage Ruffles	\$10
Super bloomer with over 300 blooms after 3 years. Early bloomer pastel blend of creamy yellow with pink blush and darker pink edges. Very fragrant and heavily ruffled. Repeat bloomer.	
Hemerocallis Gentle Shepherd	\$8
Lightly ruffled near white 5" flower. Flower has a chartreuse throat.	
Hemerocallis Happy Returns	\$8
Canary yellow blossoms with excellent growth habit. Consistent bloom May-frost. Heat tolerant. 16" plant, 3" bloom. (Apps)	
Hemerocallis Hyperion	\$7
This older daylily has trumpet-shaped flowers of lemon yellow with a tiny green throat. When viewed from the side, the flowers are shaped like a lily. As with many of the older cultivars, this one is taller, reaching 40", and has sweetly fragrant flowers. Daylily cultivars come and go. The fact that this one has been in cultivation for more than 80 years attests to its excellent traits and good vitality.	
Hemerocallis Joan Senior	\$8
Lightly ruffled, recurved near white self; lime green throat. Excellent bud count and branching. Popular white. 25" early to mid-season bloom; 6" flowers.	
Hemerocallis Jolyene Nichole	\$10
Glowing rose-pink blend with deep rose veining and green throat. Large blooms on a small plant make this daylily a good choice for containers. Ranks high in the AHS popularity poll. (Spalding '84).	
Hemerocallis Mary Reed	\$8
Extended blooming plant with 2 1/2" flowers. Flowers are purple bi-tone with white midribs on a short compact plant.	
Hemerocallis Mary Todd	\$7
Slightly ruffled lemon yellow. 1978 Stout Medal. Flowers 6". Height 24-26". Early, re-bloom. (Fay)	
Hemerocallis Night Beacon	\$8
Large, 4-5" purple flowers with large gold-green throat. Very showy flowers that rebloom. Extended bloom.	
Hemerocallis Omomuki	\$8
Citron yellow blossoms with bright green throat and heavily ruffled. Fragrant, well branched, heavily budded scapes.	
Hemerocallis Pandora's Box	\$9
Cream tepals with a cranberry-purple eye and green throat. Sunfast. Broad, rounded petals have widely ruffled edges. Blossoms open well after cool nights. Vigorous. 24". Usually repeats bloom.	
Hemerocallis Pardon Me	\$8
Known as one of the best reds for length of bloom. Deep red, ruffled blooms of good substance with chartreuse throats. 22-28" with 2 3/4" flowers mid-season and re-bloom. (Apps '82)	
Hemerocallis Penny's Worth	\$8
Probably the smallest daylily we've seen, reaching only about 10". Perfect for edging or the rock garden. Reblooms all summer when moisture is provided. Golden yellow flowers bloom just above the foliage.	
Hemerocallis Purple Water	\$7
We watch for the more open form of Daylilies as there are not many offered these days. They all seem to have very wide, overlapping petals, which are nice, but there are just so many. So when we saw 'Purple Water' we immediately ordered a supply. This is not really a spider daylily, as the petals are not that narrow and do not recurve, but it is definitely an open form with narrower, longer petals that separate from each other nicely to give a clean look. Rich purple color with greenish throat. Starts blooming early to mid summer. This is a vigorous grower that will re-bloom in ideal conditions. Also, its extended day blooms last longer for more flower power.	
Hemerocallis Razzamatazz	\$8
A very pretty new daylily, early to mid season and reblooming. Compact 20" plants have purple flowers with yellow centers.	
Hemerocallis Red Ribbons	\$7
Red ribbon-like petals form huge 8" eye-catching flowers. Tall plants at 3-4' bloom mid-season.	
Hemerocallis Red Volunteer	\$9
Deep bright red, very rich color with 7" flowers. Profuse bloomer and great grower. 30-36", mid-season.	
Hemerocallis Ruby Stella	\$8
Reblooming daylilies are always a welcome addition to the perennial garden. 'Ruby Stella', a cousin of the famous 'Stella d'Oro' continues the Stella tradition of blooming several times through the season. 3" Flowers are intense wine or ruby red with a yellow streaked throat on a 12 - 24" plant..	
Hemerocallis Ruffled Apricot	\$8
Lightly ruffled deep glowing apricot flower with creamy pink midribs and intense golden throat. Fragrant and of heavy substance. Vigorous grower. Excellent choice. 28" with 7" flowers mid-season. (Baker '72)	

Hemerocallis Salieri	\$10
Named after Mozart's nemesis, the 'Salieri' daylily is rich with very dark purple velvety petals and a yellow eye. Strong tetraploid with a long bloom period beginning in early summer. Large 5" blossoms on 26" stems.	
Hemerocallis Starstruck	\$10
Huge 7" blooms of delicately ruffled yellow. Heavy substance and light fragrance. Add this late bloomer to extend the season. Partial shade during summer is recommended south of zone 8. All-American Winner in 1998.	
Hemerocallis Startle	\$14
Well, it IS a little startling. The forward petals are so crinkled that it looks like they were stitched. The flowers are bi-color described as red or magenta-red with the forward petals darker and the rear petals the same color but with an infusion of white. The ruffled front petals are edged in creamy yellow. This tetraploid boasts some of the largest flowers at 5 - 6" and there will be plenty of them as it is a strong bloomer.	
Hemerocallis Stella de Oro	\$8
The most popular daylily to date, this dwarf yellow was a 1985 Stout medal winner. Blooms profusely early summer then repeats on and off with smaller flushes of bloom until frost. (Jablonski)	
Hemerocallis Strawberry Candy	\$8
1998 Stout Silver Medal as #1 daylily. Strawberry pink with rose-red eyezone and golden green throat. Tetraploid destined to be very popular. 26". (Stamile '89).	
Hemerocallis Strutter's Ball	\$10
A hybridizing triumph for color and size. Dark black-purple flowers with a small silver-white watermark and silky halo above the small lemon-green throat. Superior branching and heavy bud count. Strong sturdy habit. Favorite in American Hemerocallis Society poll. Tetraploid, 28", 6" flowers. (Moldovan '84)	
Hemerocallis Wineberry Candy	\$10
Creamy orchid pink with purple eyezone and green throat. 5" flowers on 22" stems. Tetraploid. (Stamile).	
Hemerocallis citrina	\$8
This is the hard to find night flowering species with fragrant greenish-yellow to lemon-yellow flowers. 3 1/2 to 5" flowers on 4' stems. The interesting flowers have a series of several narrow petals and look much different than the usual hybrid daylilies more commonly available.	
Hemerocallis lilioasphodelus	\$8
A nocturnal blooming Hemerocallis with an extended blooming period. Semi-evergreen with narrow leaves and fragrant, clear bright lemon-yellow flowers 3 1/2" across. The relatively simple flower has a very clean look and is a great addition to the evening garden. To 3' tall and 3' wide.	
Hemerocallis middendorffii	\$7
Another of our species offerings. Semi-evergreen with narrow stiff leaves to 12". Early in the season, reddish-brown scapes bear star-shaped deep orange flowers 2 1/2 - 3" across. 36" tall.	

Genus: Heuchera	Zones 4 to 8	 
Heuchera Amethyst Myst		\$11
We like the glossy sheen of the amethyst leaves on this Heuchera. We also like the fact that the clumps get so large, sometimes reaching 24" across. Tawny flowers stand tall on 26" stems. A new star for the part-shade border.		
Heuchera Birkin		\$12
This is a really nice Heuchera selection for its very compact habit. And the foliage is great too, having attractive tricolor leaves of silver with plum veins and green edges. Cream-colored flowers.		
Heuchera Circus	PPAF	\$11
Leaves emerge peach with red veins. On development leaves turn radiant shade of chartreuse with red veining and a light dusting of silvery.		
Heuchera Frosted Violet	PP15085	\$12
A recent introduction from Charles and Martha Oliver, this strikingly beautiful Heuchera combines good vigor with a wonderful burgundy-violet color which intensifies in the fall. Flowers are like pink seed pearls. Foliage to 15", flowers to 30".		
Heuchera Galaxy		\$12
From Terra Nova, one of the best suppliers of new Heuchera cultivars comes Galaxy. A bit like 'Midnight Rose', but with leaf background more of a very dark brown rather than black. Very large, thick leathery foliage, very heavily variegated with spots of red. Leaves emerge a startling bright red, and turn darker as they age, the variegation on the other hand gets lighter colored and more noticeable as the season progresses. 'Galaxy' will love heat and humidity, but performs very well in cool climates too.		
Heuchera Geisha's Fan		\$10
One of the great purple-foliage Heucheras, this one forms a low dense mound with pink spring flowers. The foliage is a nice blend of purple with silvery centers and sometimes a hint of silver-green.		
Heuchera x villosa Caramel	PP16560	\$12
This villosa species Heuchera is more tolerant of heat and humidity than the others, so if you are in a warmer zone, try 'Caramel'. The foliage (pictured in our color section) emerges bright gold and takes on apricot tones as the season changes from spring to summer. Leaves become a bright salmon red in the fall. The villosa species blooms in summer, long after the other Heucheras have bloomed. 'Caramel' will have small creamy colored flowers on 18" stems.		

Heuchera x villosa Miracle PPAF \$12
 From Thierry Delabroye of France comes this new and unique villosa hybrid. New leaves are chartreuse with a smattering of reddish purple in the center. Mature leaves are brick red to reddish-purple with a chartreuse to gold edge and silver undersides. Pink flowers. Foliage 8 - 10" high.

Genus: Heucherella Zones 4 to 8  

Heucherella Solar Eclipse PPAF \$12
 Leaves of brown bordered in lime green with broadly scalloped leaf lobes. Vigorous mounds of dense crowns.

Heucherella Sunrise Falls \$12
 A vigorous, trailing Heucherella with large, yellow, maple-shaped leaves and red veins. Fall leaves have dramatic red tints. Needs some sun to develop best color. In full shade it will have chartreuse leaves with flecks of red.

Heucherella Sweet Tea \$12
 Another great Terra Nova introduction, we've sold a lot of 'Sweet Tea'. Spring leaves like cinnamon stars. These big, palmately cut leaves darken in the summer and lighten up again in the fall. Its H. villosa breeding gives it a big bold habit. An instant classic for containers and garden. True to its genus, it should have part shade. Prefers more moisture than Heuchera.

Genus: Hosta Zones 3 to 9   

Hosta Appletini \$14
 This is one of the 'tini' series and grows to about 6" in height. Leaves are bright yellow in spring changing to apple green by around July 1. Leaves are wavy and smooth with good substance. Medium to fast growth rate with purple flowers on 9" scapes in August. S.

Hosta Azure Frills \$16
 From Q & Z, which is now out of business, this one may be hard to find in the future. A medium-sized Hosta (15" high x 37" wide mound) it has striking powdery blue leaves with rippled edges. The leaves form an arching mound. Pale purple flowers on 12 - 20" scapes. A medium to fast grower.

Hosta Azuretini \$12
 Medium blue green color slightly wavy.

Hosta Baby Booties \$16
 A new mini-dwarf, forming a mound only 5" high. Leaves 2 3/4" long by 1 3/8" wide, green centered with 1/8 to 1/4" creamy white margins. Small hosta, but in July its pale purple flowers will be held high on 25" scapes.

Hosta Big Daddy \$14
 Large, blue-green and slug-resistant. What more could you ask for? Nice cupped leaves and near white flowers in dense clusters. Forms a clump 24" high by 66" wide. Leaves tend to change to deep green by late summer. L.

Hosta Birchwood Parky's Gold \$7
 A good medium gold that grows fast and puts out lots of lavender flowers. M.

Hosta Blaze of Glory \$11
 Brilliant gold leaves 11" long x 4" wide. Forms a large clump 20" high x 44" wide. Slightly wavy leaves with good substance in a plant with medium growth rate.

Hosta Blue Cadet \$8
 Vigorous dwarf blue-green with heart-shaped leaves forming a nice mound. D.

Hosta Blue Mammoth \$11
 This massive blue, introduced by Paul Aden, can reach 5' across at maturity. Heavily corrugated leaves with stately near-white flowers makes this selection perfect as a specimen or a background planting. Foliage is deep blue and slug-resistant. L.

Hosta Blue Mouse Ears \$11
 We like this adorable miniature Hosta for its thick leaf substance. Leaves are not as blue as some, tending to be blue-green to gray-green, but it forms such an attractive symmetrical mound that that the color isn't the primary consideration. Clumps will be about 5" tall and 12" round at maturity. Lavender flowers. D.

Hosta Blue Umbrellas \$11
 A large blue with a surprisingly fast growth rate. This one gets huge quickly. A nice addition if you're just starting your Hosta collection. L.

Hosta Blue-haired Lady \$14
 This newer Hosta has leaves of very good substance. They are bluish green in spring, turning to dark green by mid-summer. Nice and shiny. Whitish flowers on 30" scapes in July. Medium growth rate forming a clump 16" tall by 40" wide. M.

Hosta Carnival \$12
 An exciting Hosta with an irregular yellow margin that streaks to the center of the green heart-shaped leaves. Lavender flowers. L.

Hosta Carolina Sunshine \$14
 Forms a dense mound with very shiny foliage that reminds us of 'Invincible'. Leaves are dark green and wavy with narrow yellow margins. This fast grower is a hybrid of 'Swoosh' and H. tibae from Tony Avent of Plant Delights Nursery. S.

Hosta Celestial	\$14
Leaves with white margin and dark green center. White border is 1 1/2" wide. Leaf is 11" long by 9" wide and heavily corrugated.	
Hosta Chart Topper	\$14
A blue-leaved sport of 'Smash Hit', this is a Mark Zilas introduction. Good color in wide leaves with thick substance and nice veining. Medium to fast growth rate forming a clump 18" high x 40" wide.	
Hosta Citratini	\$8
Green leaves 3 1/2" long by 2 1/2" wide; foliage emerges bright gold, then changes to shiny green, slightly wavy.	
Hosta Clear Fork River Valley	\$12
We added this Hosta to our offerings because it is probably the best example of a corrugated leaf that you'll find. Dark green BIG leaves are 14" long by 11" wide with heavy substance and good slug resistance. The mound will be 26" high and over time will reach 51" wide. 32" scapes bear very pale lavender flowers. L.	
Hosta Cream Cheese	\$12
Green centered leaf with a 1/2" wide wavy margin that changes from yellow to white.	
Hosta Curly Fries	\$14
This one hardly looks like a Hosta with its long (7") and skinny (1 1/2") leaves. Rippled gold foliage forms a mound 11" high. Makes a great container plant. It's a hybrid seedling from 'Pineapple Upsidedown Cake' M.	
Hosta Deane's Dream	\$12
Deep blue green, ovate shaped leaf, slightly wavy, and faintly corrugated at maturity. Red petioles.	
Hosta Designer Genes	\$12
This was a favorite at the 2006 American Hosta Society convention, with its bright gold leaves supported on red petioles. A medium Hosta with leaves 6" long by 4" wide forming a clump 12" high. Medium to fast growth rate. M.	
Hosta Diamond Necklace	\$16
I'm a sucker for hostas with striking white centers with distinct margins. This one has 4 1/2" long x 2 2/4" wide leaves and stands out even in the shade. It's generally a small Hosta, reaching a mound size of about 10" high by 22" wide. It's somewhat of a slow grower, so put it in a trough or a shaded rock garden where you can keep an eye on it for best results. Medium purple flowers on 16" scapes.	
Hosta Dinner Mint	\$16
A new sport of 'Lemontini' from Q & Z Nursery. Gold to bright yellow centered leaves 3" long x 3" wide with dark green edges. Small and dense, reaching 7" high x 15" wide. Perfect for trough gardens or containers.	
Hosta Earth Angel	\$11
First yellow edged sport from Blue Angel. Leaves blue green in center with a 1 1/2" wide yellow margin.	
Hosta Elvis Lives	\$9
A unique Hosta with narrow arching blue leaves with wavy margins. The color and texture give it a soft suede look. A must-have specimen. M.	
Hosta Emerald Crown	\$8
Hybrid of Halcyon and Resonance and others. Shiny dark green leaves smooth texture.	
Hosta Emerald Ruff Cut	\$22
Formerly Emerald Island. Sharply contrasting gold green variegation. Gold center with a rippled 1/4" wide dark green margin.	
Hosta Enterprise	\$16
I love the bold white centers and the better-than-average substance for a white-centered Hosta. In the large category, the mound will reach 20" in height. Leaves about 8" long by 6 1/2" wide. Green margins with white to creamy-white centers. L.	
Hosta Fantasy Island	\$12
Finally, a newer small white centered Hosta that is a tetraploid form of 'Island Charm', and noticeably better than its parent. Better sun tolerance, better vigor, better substance. The good wide green margins set off the white centers and make this one of the Hostas we've all been waiting for. Lavender flowers on pink scapes in summer. M.	
Hosta Fat Cat	\$12
Golden leaf 12" long by 9" wide and heavily corrugated.	
Hosta Fire Island	\$11
This is the first yellow-leaved Hosta to have red petioles with red extending up into the base of the leaves. Brilliant yellow rippled leaves in spring change to chartreuse in summer. Best in full shade. M.	
Hosta Frosted Mouse Ears	\$14
A sport of Royal Mouse Ears features blue green to dark green in the center with a wide creamy white margin. Dense clusters of purple flowers on 12" scapes in July. The mound will reach 7" in height. Leaves rounded, being about 2 1/2" long and 2 1/4" wide. D.	
Hosta Gemstone	\$14
Tony Avent hybrid of H. venusta x Dorset Blue. Wide blue green oval shaped. Smooth texture.	

Hosta Giantland Sunny Mouse Ears	\$14
Another in the "Mouse Ears" collection of Hostas, this is the first introduced seedling from 'Blue Mouse Ears'. Gold foliage of excellent substance. Brightest in spring, turning chartreuse by mid summer. Mound: 3" high x 10" wide. From Terri Meyer and Jeff Miller of Land of the Giants Hosta Farm in Milton, Wisconsin.	
Hosta Gold Edger	\$8
A vigorous growing small edger Hosta. Compact mounds of chartreuse heart-shaped leaves. Lavender flowers. S.	
Hosta Golden Tiara	\$7
Small Hosta with light green heart-shaped leaves with yellow margins. A great fast growth habit makes this a valuable addition. Purple flowers. S.	
Hosta Great Expectations	\$14
This one lives up to its name. Beautiful large yellow heavily puckered leaves edged by irregular wide margins of blue and light green. White flowers. Acclaimed as one of the most beautiful Hostas. Said by some to be finicky to grow, but it should do well if given the right soil and morning sun with very open afternoon shade. L.	
Hosta Grecian Vase	\$11
Chartreuse leaves 10 1/2" long and 8 1/2" wide, slightly rippled.	
Hosta Halcyon	\$9
A classic deep blue with wedge shape leaves that forms a nice mid-sized mound. Excellent growth rate. M.	
Hosta Harvest Dandy	\$9
Leathery, dark olive-green, shiny leaves. Slug resistant. Light lavender flowers on black floral stalks. M.	
Hosta Heart Broken	\$11
This cultivar from Robert Solberg of Green Hill Farm is an attractive small Hosta with a medium to fast growth rate. Forms a dense mound of wavy foliage that emerges chartreuse, becoming medium green; oval-shaped leaf blades. 12" high x 30" wide at maturity. Pale purple flowers in July on 20" scapes. S.	
Hosta Hirao Supreme	\$11
This is a large hosta with wavy light green leaves. Resembles "Hirao Majesty", but is lighter green.	
Hosta Itsy Bitsy Spider	\$18
This is a tiny one. The mound will be only 2 1/2" high by 6" wide. The leaves are dark green and about 1 3/4" long by 1 1/4" wide. One of the best very small Hostas even though it has a medium to slow growth rate. D.	
Hosta Jubilee	\$14
Leaves 8" by 4" dark green center and 1/2" wide yellow margin. Fast growing.	
Hosta June	\$12
American Hosta Growers Association "Hosta of the Year" for 2001. Gold leaves bordered by a blue and green-shaded margin. The light centers bleach to white in bright light. Has great substance. M.	
Hosta Kaleidochrome	\$30
What an interesting leaf: streaked and mottled green with large areas of creamy white and yellow. Narrowly ovate shaped leaves are 5" long by 2 1/2" wide. Mound will be 10" high. Needs better drainage than many Hostas. S.	
Hosta Korean Snow	\$27
Dusted with a light powder of snowy variegation, H. 'Korean Snow' is unique unto itself. Its shiny green leaves, of excellent substance, are streaked and misted in white to butterscotch. The variegation is brightest in spring and is very stable. Blooms later in the summer than most with H. yingeri type flowers, having very narrow tube like petals in lavender to purple. A seedling of the Korean species H. yingeri. S-M.	
Hosta Lakeside Baby Face	\$10
Low dense mound of creamy white margined foliage. Dark green center with 1/4" wide yellow to white margin. Oval shaped, slightly wavy.	
Hosta Lakeside Down Sized	\$14
A nice new dwarf introduced in 2003. Plants only 5" high at maturity form a dense small mound. Leaves have pale green center and rippled creamy white margins. Purple flowers later - in August. D.	
Hosta Lakeside Tee Ki	\$15
Small mound size, gold centered with a light yellow margin, wavy.	
Hosta Lemon Lime	\$8
Small wavy chartreuse leaves on a low-growing Hosta make this one a perfect edger. S.	
Hosta Lewis and Clark	\$20
Vivid foliage colors, gold centered ruffled plant with green margins.	

- Hosta Loyalist** \$11
This is a very special Hosta that doesn't come along often. It's the reverse form of the famous 'Patriot': a deep green edge and a nearly white center with extra heavy substance. It's very striking with its bold nearly pure white centers. Lavender flowers on cream-white stems. M.
- Hosta Lullabye** \$14
This is a pretty one, with leaves pale yellow, turning a nice chartreuse by late summer. Slightly rippled margins. This one is best as a specimen plant near the front of the shaded garden. Pale purple flowers on 17 - 23" scapes in August. 12" high x 30" wide. S.
- Hosta Mama Mia** \$14
Dark green wavy leaves with margins of gold gradually fading to pale cream. At first frost, leaves change entirely to gold. Pale lavender flowers. M.
- Hosta Martini** \$18
Green leaves 5" long by 3 1/2" wide; dark green foliage. Forms a small mound of wavy, dark green foliage.
- Hosta Maui Buttercups** \$15
A nice small hosta with 5" rounded bright gold leaves that are unusually deeply cupped and corrugated. Leaves are of heavy substance and demonstrate good slug resistance. Flared violet flowers top off this treasure, making it one of the best yellow Hostas.
- Hosta Minuteman** \$9
Similar to 'Patriot', this selection from H. 'Francee' has heavier substance, a darker green center and a creamier white border. Somewhat cupped. Pale lavender-striped flowers on 24" scapes. M.
- Hosta Orion's Belt** \$12
Leaf 8" long by 5" wide, shiny, dark green center, 1/2" wide creamy white margin.
- Hosta Peanut** \$12
Leaves 4" long by 2 3/4" wide, dark green margin streaking into the creamy yellow to white center. Heavily corrugated. Small mound.
- Hosta Pilgrim** \$10
Heart-shaped, light gray-green leaves with wide, irregular creamy white to white margins. Horizontal habit. Up to 8" high. D.
- Hosta Pineapple Upside Down Cake** \$16
Introduced by Mark Zilis and Bob Solberg in 1999, this is one of the newer Hostas that is really different from those that we'd seen before. It has long, wavy leaves (H. lancifolia is in its heritage) that emerge pure green, but quickly turn bright gold with just a narrow edge of very dark green. It is brilliant and striking in the summer garden. M.
- Hosta Plug Nickel** \$12
This is a real miniature, a sport of 'Cracker Crumbs'. Foliage typically in a 6" mound spreading to 14" wide. Dark green well-veined leaves with slightly rippled margins. R. Solberg introduction in 2003.
- Hosta Powder Blue** \$12
From a seedling discovered in Japan comes this very large slug resistant introduction. The leaves are thick and heavily corrugated and have a great powdery blue color. The huge mound will reach 26" in height and 60" in area after several years. Medium to slow growth rate. L.
- Hosta Praying Hands** \$12
Medium, very unique Hosta forms clumps of upright facing foliage, the upright narrow leaves remain curled and have a thin creamy edge along the wavy margins, pale lavender flowers.
- Hosta Puddles and Bumps** \$16
Shiny and corrugated says it all! Lots of depressions throughout the leaf blade on this fast-growing hybrid by Mark Zilas of Q & Z Nurseries. Dark green leaves form a 14" high x 32" wide mound.
- Hosta Queen Josephine** \$18
A real standout with its very glossy leaves of dark green with a nice margin of yellow, lightening during the season. Lavender flowers. Should be in every collection. M.
- Hosta Queen of the Seas** \$12
From the famous Mildred Seaver, this fine Hosta took the 1997 National Hosta Convention by storm, winning "Best of Show". The pointed, heart-shaped leaves have a piecrust margin and are deep blue. In more sun and in hotter climates, the blue will fade during the second half of the season. L.
- Hosta Rascal** \$18
Medium gold center with 1/2" wide chartreuse margin that develops more contrast by mid-summer and in brighter light. 25"H x 55"W. Lavender flowers on 30" scapes in July. M-L.
- Hosta Red October** \$12
One of the best in the line of red petiole Hostas. Dark red on front and back of petiole extending onto the top of each leaf blade. Glaucous tapering leaves with white underside. Very floriferous. M.
- Hosta Regal Rhubarb** \$20
Another Hosta people are looking for because of its bright red petioles. It's a Hosta with upright leaves and an open habit. L.

- Hosta Regal Tot** \$14
A true dwarf, the mound will only get to 5 1/2" high. Leaves 4" long and 3" wide, chartreuse in the spring becoming more golden as the season progresses. Slightly cupped and corrugated leaves make this tiny tot a gem in the dwarf garden. D.
- Hosta Reptilian** \$16
With age, H. 'Reptilian' develops rippling, puckering, corrugation and cupping of the leathery leaves, reminding imaginative souls, we guess, of reptile skin. It is certainly unique and intriguing and will be a conversation piece in the Hosta garden. M.
- Hosta Royal Standard** \$8
This old cultivar is a standard in every part shade garden. Large rich green leaves on a sun-tolerant fast grower. Has large white fragrant flowers. L.
- Hosta Sagae** \$14
Dramatic color and majestic form make this a required Hosta in any collection. Vase-shaped growth with large frosty blue leaves edged with creamy yellow. American Hosta Growers "Hosta of the Year" for 2000. In a class by itself. L.
- Hosta Sara's Sensation** \$18
Wide gold margins with blue green in the center. Heavily corrugated.
- Hosta See Saw** \$11
Medium hosta with dark green leaves 6" x 3" with variable white margins. Some gray streaking toward the midrib, leaves somewhat cupped up or down.
- Hosta Sentimental Journey** \$14
A big hosta reaching 24" tall x 50" wide for the foliage clump. Thick substance leaves have a chartreuse center and a 1" wide margin that changes from chartreuse to gold. This is a sport of 'Piedmont Gold' and the variegation is subtle but very attractive. Flowers are white on 3' scapes in June and July. L.
- Hosta Silver Halo** \$12
From Japan, this dwarf Hosta is a member of the H. sieboldii group, like H. 'Kabitan'. Leaves are somewhat spoon-shaped with a good white margin. Leaves are broader than H. 'Kabitan'. 12"H, 12"W. S.
- Hosta Sparticus** \$14
This one will form a big mound (26" x 51") but it also makes a great specimen plant (think about three in a clump for a fast start). Big leaves (13" long x 10" wide) are rippled with a medium green center and a 1" wide gold margin - and they have good substance. An added attraction is that it's flowers are near-white.
- Hosta Stained Glass** \$11
A Hosta that really stands out, we have a nice mature clump in one of our gardens and when people see it, they want it. It's a sport of 'Guacamole' with striking brilliant gold-centered foliage all season long. Leaves are 9" long by 7" wide with a wide green margin. Fragrant lavender flowers on 30 - 36" scapes. M.
- Hosta Star Power** \$15
Forms a medium-large mound (20" x 50") of nicely rippled bright gold foliage. Some corrugation of the leaves as well as good substance. Pale lavender flowers on 33" scapes.
- Hosta Sugar and Spice** \$12
Creamy white margined sport of 'Invincible'. Leaves are 8" long by 6" wide, with green center and a 1/4" wide creamy white margin.
- Hosta Sum and Substance** \$14
A classic of immense proportions. If you don't have one, now is the time to get this most popular Hosta. Gold leaves that need some sun for best color. Lavender flowers. L.
- Hosta Sun Power** \$11
One of the best golds and one that can take considerable sun. Unique twisted pointed leaves add interest. Orchid flowers. L.
- Hosta Surfer Girl** \$14
Miniature medium green rippled, smooth texture.
- Hosta Sweet Home Chicago** \$14
This is a dark-green margined, gold-centered sport of 'Birchwood Parky's Gold' with colors that intensify as the season progresses. Forms a dense medium-sized mound topped by lavender flowers on 30" scapes in July. M.
- Hosta Tambourine** \$12
Beautiful plant with heart-shaped leaves, wide creamy margins and lavender flowers. Fast grower forms an upright clump. M.
- Hosta The King** \$24
Attractive streaking variegation, bluish green in the center with a gold to creamy white margin, slightly rippled, moderately corrugated. Leaves are 10" long by 7" wide.
- Hosta Tidewater** \$14
This one has been around for awhile. It's a 1988 introduction by Mark Zilas, known for its bright blue color on a long, relatively narrow leaf. Stays intensely blue into late summer, then turns dark green Medium to fast growth rate, form a mound 20" high x 48" wide.
- Hosta Topaz** \$11
This excellent grower produces a dense mound of strikingly beautiful deep blue foliage of good substance. Hybrid of 'Neat Splash' x 'Dorset Blue' 16"H x 33"W. M.

Hosta Torchlight	\$12
A nice vase-shaped dense mound is formed by this fast growing Hosta. It has green-centered leaves with white margins and purple red petioles. Lavender flowers. M-L.	
Hosta Toy Soldier	\$11
This sport of 'Blue Cadet' from Bob Solberg forms a dense mound of heart-shaped leaves with green centers and gold margins. The medium-sized mound will have a good show of lavender flowers in July. M.	
Hosta Ulysses S. Grant	\$20
Vase shaped mound with rich blue foliage, corrugated leaves.	
Hosta Venetian Star	\$16
Nice deep blue foliage on a Hosta with an arching mound habit. The leaf edges are heavily rippled. The scapes will be about 42" high and bear pale purple floers. Purplish red petioles. Mound 19" high x 40" wide.	
Hosta Victory	\$22
Vigorous, huge mound of margined foliage. Leaves are 12" long by 9" wide, shiny, medium green center with 1/2" wide margin of greenish yellow, changing to creamy whtie by early summer. Smooth texture.	
Hosta Wide Brim	\$8
Round bluish-green leaves with a wide creamy margin. Light lavender flowers. An old favorite that remains popular. M.	
Hosta Wolverine	\$11
A new introduction in 1995 and in demand. Beautiful gold-edged blue with lance shaped leaves and a good growth rate. Lavender flowers, gently arching foliage. M.	
Hosta Woolly Mammoth	\$12
A mammoth of a plant - put it next to 'Blue Mammoth' and have both prehistoric beasts. It is, in fact, a sport of 'Blue Mammoth' with outstanding gold margins contrasting a blue-green center. Thick substance to the leaves, like mammoth skin, I guess. Mature clump is 28" high by 60" wide. L.	
Hosta Wylde Green Cream	\$15
Small mound forming Hosta, yellow-gold leaves with narrow medium green margins. Leaves slightly rippled. Pale lavender flowers. Sport of Vanilla Cream. S.	
Hosta Yin	\$14
Small, heavily substanced dark blue perfectly heart shaped leaves with a wide creamy white margin. Light lavender flowers in July. A truly beautiful little Hosta, the perfect specimen. S.	
Hosta Zodiac	\$12
Begins the season with chartreuse-centered, creamy yellow-margined coloration, but changes to gold-centered, white-margined by mid-summer. 'Zodiac' is a sport of 'Richland Gold (which is itself a sport of 'Gold Standard'). The changing foliage colors make this a plant of interest through the season. 19" high x 53" wide. M - L.	
Hosta sieboldiana	\$9
Forms a large mound of thick green foliage (slightly blue early in the season) and bears near-white flowers in June-July. The leaves have thick substance and are slightly corrugated and rippled. Makes a good large groundcover. L.	
Hosta plantaginea var. Grandiflora	\$12
Glossy green leaves, white fragrant flowers. This is a parent of most of the large white-flowering fragrant Hostas. Selected for the grand flowers. M.	
Hosta lancifolia	\$8
A great ground cover. Shiny dark green lance-shaped leaves in mound form. M.	
Hosta montana Fujiboton	\$14
Leaves dark green, slightly wavy, with good substance. Clump 24" high with double-petaled flowers of lavender late July to mid-August. The leaves are deeply veined and rippled, but the claim to fame of this Hosta is the flowers, which are consistently double and last about three weeks in late summer on scapes well above the foliage. M - L.	
Hosta clausa	\$8
Its rhizomatous habit makes H. clausa a wonderful ground cover, typically increasing 12" or more in width each year. The many scapes produce abundant purple buds that enlarge then drop without opening, creating a striking and unique display. M.	
Hosta aequinoctiantha	\$12
This japanese native species flowers late in the season with attractive white bracts backing the flower heads. Shiny medium to dark green irregularly rippled leaves. M.	

Genus: Iris	Zones 4 to 9		
Iris sibirica Butter & Sugar			\$8
28" plants with white standards above yellow falls. Unique award winner.			
Iris ensata Azuma Kagami			\$9
Bluish-white to lilac floers with darker lilac to purple veins make a distinctive and lovely flower. Purple stamens and a small yellow spot at the center of the primary petals. 24".			

Iris ensata Mt. Fujiyama	\$8
One of the oldest and favorite Japanese Iris, Mt. Fuji blooms in late spring to early summer on 28 - 36" stems with large pure white flowers with a crepe texture. Graceful upright foliage sets off the flowers. Best in moist areas that are somewhat acidic.	
Iris ensata Pink Lady	\$9
Silky pink flowers on 36" stems. Very nice.	
Iris cristata	\$7
Blue violet flowers. Good ground cover for shady situations. Sun to part shade. 4"; blooms Apr.-May.	
Iris germanica group Armageddon	\$10
Light lavender pink standards and dark plum purple falls, accented with a light lavender pink ruffled edge.	
Iris germanica group Champagne Elegance	\$8
A reblooming iris with apricot flowers. 8-10 blooms per stem. Height of 34" and a width of 18-24". This Iris blooms heavily in early summer and then reblooms in late summer. HM '89, AM '91	
Iris germanica group Immortality	\$8
Medium sized pure white self with light yellow beards. Short stems with close branching. Best known as THE re-blooming wonder. Good vigor. 2-3 stems per clump, re-blooming in late summer. HM' 86. AM '90. Mid-season. 29".	
Iris germanica group Magical Encounter	\$10
Intense pink shrimp tones, bright salmon-pink beards. Excellent bud count.	
Iris germanica group Megabucks	\$10
Wonderful color blend, bright gold standards and fuchsia falls with a butterscotch edge.	
Iris germanica group Team Spirit	\$8
This iris's standards are a light lavender-blue. Its falls are vibrant purple. It has a white spray pattern in the centers of the falls with orange beards. It also has a sweet fragrance. HM '07	
Iris pallida Argentea Variegata	\$9
Blue iris flowers on very attractive green foliage with a creamy white edge. Fragrant. 36".	
Iris pallida Aurea Variegata	\$9
Fragrant blue-lavender flowers on nice clumps of yellow-edged foliage. 36".	
Iris pumila group Raindance Returns	\$8
Large sky blue self.	
Iris pumila group What Again	\$8
Lavender blue standards and apricot yellow falls on a 10" reblooming dwarf. AM '96.	

Genus: Kirengeshoma	Zones 4 to 9	 	
Kirengeshoma palmata			\$11
3' herbaceous bushes with palm-shaped leaves and large yellow pendant flowers in Sept.			
Kirengeshoma koreana			\$11
Cool waxy yellow tubular flowers on an attractive plant with large maple-like leaves. Differs from K. palmata in that flowers are open and up-facing. Blooms late summer to mid-fall. 30".			

Genus: Lamiastrum	Zones 3 to 8	 	
Lamiastrum galeobdelon Herman's Pride			\$8
Lamiastrum is a good shade ground cover with attractive green and silver spotted foliage. Excellent for dry shade. 12-14".			

Genus: Liatris	Zones 3 to 9	 	
Liatris spicata			\$8
This is the most commonly sold native species and it tends to be fairly drought tolerant. Long lasting 30-36" spikes of mauve-purple make good cut flowers.			
Liatris spicata Floristan White			\$8
Like 'Floristan Violet', this cultivar should have a fuller, longer plume. We know it will make a good cut flower. 2-3' spikes of white buttons in summer.			
Liatris spicata Kobold			\$8
12-15" spikes with lavender buttons in mid-summer. 2 - 3 corms planted per pot for a nice clump.			

Liatris aspera \$8

Tufts of lavender flowers loosely line the 2-3' stalks creating a showy flower spike. Blooms in Aug.-Sept. and attracts butterflies. Average soil conditions.

Liatris pycnostachya \$8

This native is another great butterfly and accent plant. Its 3' flowering stems are crowded with magenta flowers in Aug.-Sept. Good cut flower. Does best in rich medium to moist soil. 3-5'.

Liatris ligulistylus \$8

Unlike most Liatris, this species is branched with many individual pompon flower heads along the stalk. Crimson buds yield purple flowers in summer over an extended period. Best in rich soils. A favorite of Monarch butterflies and goldfinches. 3-5 feet.

Liatris borealis \$8

This rare New England native is a highlight of the summer meadow. Brilliant red buds open to bright lavender-pink flowers that are butterfly magnets. Late summer bloomer that thrives in well drained or dry, sandy, or rocky soils. 36"

Genus: Ligularia Zones 4 to 8

Ligularia przewalskii \$9

Spires of bright gold-yellow flowers on purple or black stems. Very deeply cut dark green leaves. Somewhat more tolerant of sun and dry conditions. 4 - 5'.

Ligularia stenocephala Little Rocket \$14

A striking compact version of 'The Rocket'. If you've avoided Ligularia because of space limitations, or if you have a spot for a nice compact version, this is what you've been waiting for. Has the same dark leaves and yellow rocket flowers as it's bigger cousin.

Ligularia stenocephala The Rocket \$11

Year after year, 'The Rocket' is the most popular of all of the Ligularias. With its spires of bright yellow flowers on dark stems, over large clumps of green finely toothed leaves, we think this is probably the best all-around cultivar out there. Foliage to 4', flowers to 6'.

Ligularia dentata Britt-Marie Crawford \$16

A spectacular introduction with large chocolate-maroon leaves with dark purple undersides. Orange-yellow daisy-like blooms in late summer for a stunning color combination. Foliage should be about 30 - 36", flower stems 36 - 48".

Ligularia dentata Othello \$9

3' plants with large purple leaves and orange daisy flowers. Blooms about 2 weeks later than L. 'Desdemona'.

Genus: Liriope Zones 4 to 9

Liriope spicata \$8

Evergreen grass like ground cover. Dark green strappy leaves. Tolerates dry shade. Pale lavender flowers.

Genus: Lysimachia Zones 3 to 8

Lysimachia clethroides \$8

White gooseneck flowers in summer on 3' arched stems. Attracts butterflies. Very adaptable. We love the flowers, but it is said to be rather invasive, given the right conditions. Do some research and use caution before introducing this plant into your garden.

Lysimachia nummularia Aurea \$8

A great plant for containers, also effective as a ground cover or for edging. Yellow flowers over chartreuse leaves, deepening to lime-green in summer. Doesn't exceed 2" in height.

Genus: Macleaya Zones 3 to 8

Macleaya microcarpa Kelway's Coral Plume \$8

Copper plumes over silvery foliage in August-Sept. 5' tall.

Genus: Malva Zones 4 to 8

Malva alcea Fastigiata \$7

Soft green foliage. Profuse bowl-shaped soft pink flowers about 2" across on branching stems. Long blooming, June-Sept. 3-4'.

Genus: Matteuccia Zones 3 to 8

Matteuccia struthiopteris \$10

Magnificent and adaptable. 3-5' erect fronds form a large vase shape. Rhizomatous spreader.

Genus: Meehania Zones 4 to 9

Meehania cordata \$8

Meehan's Mint or Creeping Mint. This groundcover spreads nicely in part shade and moist well-drained to average soils with foliage reaching only 1"-2" tall. In late spring produces lavender flowers with dark spots.

Genus: Mertensia	Zones 4 to 9	  	
Mertensia virginica			\$8
Bears numerous bells which open pink and turn to blue on 2' stems in spring. Foliage goes dormant in summer. Great for inter-planting with summer blooming perennials.			
Genus: Monarda	Zones 4 to 9	 	
Monarda Beauty of Cobham			\$8
An interesting new color; lilac-pink and very showy; to 36".			
Monarda Blue Stocking (Blaustrumpf)			\$8
4-5' stalks bear whorls of intense purple all summer. Mildew resistant.			
Monarda Coral Reef	PPAF		\$9
Similar in habit to 'Marshall's Delight', and with the same good mildew resistance, 'Coral Reef' comes to us from Mordeen Research Center in Manitoba. The coral pink color is exceptional and it looks especially good in mass plantings. 36" high.			
Monarda Gardenview Scarlet			\$8
Highly mildew resistant variety produces 3' stems with rose-red flowers all summer.			
Monarda Jacob Cline			\$8
Huge deep rose-red flowers with dark red bracts mid-summer. Vigorous dark green foliage; 5' stems. Very mildew resistant.			
Monarda Mahogany			\$7
Maroon-purple flowers on 3' stems in summer.			
Monarda Raspberry Wine			\$8
Clear wine-red flowers. Dark green foliage on a mildew resistant plant. 24 - 36".			
Genus: Nepeta	Zones 3 to 8	 	
Nepeta Kit Kat			\$8
A unique new dwarf form that is smaller in stature with smaller leaves and tiny but numerous nearly true blue flowers. It can reach 18" in height but still works well in containers or as a ground cover.			
Nepeta faassenii Blue Wonder			\$8
Compact growing, long blooming with lavender-blue flowers May-June. Good edger. 15".			
Nepeta faassenii Six Hills Giant			\$8
Many gardeners say that their cats love this big catmint, which can spread out to 3' in diameter. It tends to flop, but that doesn't detract much from the plant, which remains full and attractive. Violet-blue flowers on plants 24-36" high.			
Nepeta faassenii Walker's Low			\$8
A nice low growing option. Gray-green foliage with soft lavender-blue flowers April until fall. 10".			
Nepeta racemosa Little Titch			\$8
A new catmint and about the shortest one to date, forming a mound of only 7 - 10" tall. If you've never had room for the big ones like 'Six Hills Giant', now is your chance to enjoy the foliage and flowers of Nepeta in a small space. Lavender-blue flowers bloom early summer into fall. It's a delight in the rock garden or up front in the border.			
Genus: Pachysandra	Zones 5 to 9	 	
Pachysandra terminalis			\$8
This is a ground cover that will grow in the darkest places of your garden. Glossy evergreen foliage with cream colored flowers.			
Genus: Patrinia	Zones 4 to 9	 	
Patrinia scabiosifolia			\$8
Leaves much like the Scabiosa plant, but larger. Yellow flowers on stems to 48".			
Patrinia scabiosifolia Nagoya			\$10
Hard to find, but available again this year, we offer this compact P. scabiosifolia selection. Similar to the species plant but reaching only 20" in height. Perfect for a burst of airy, clear yellow in a smaller or more forward location.			
Genus: Penstemon	Zone: Varies by cultivar	 	
Penstemon pinifolius Mersea Yellow			\$8
Bright yellow flowered sport. Tiny shrub with woody stems.			

Penstemon digitalis Husker Red \$8

1996 PPA Perennial Plant of the Year. Red stems and leaves and creamy white flowers, sometimes with a hint of pink. 30 - 34".

Genus: Perovskia Zones 4 to 8

Perovskia Little Spire \$10

A wonderful more dwarf form with lavender-blue flowers on a plant that reaches only 24".

Perovskia atriplicifolia \$8

Silvery gray foliage on 3' stems that bear blue flowers July-Sept. Good accent plant. PPA Plant of the Year in 1995.

Genus: Persicaria Zones 4 to 8

Persicaria bistorta Superbum \$8

Strong clump-forming plant with masses of broad basal leaves topped in May and June with stems to 2' bearing bottle-brush flower heads of cool pink. Prefers moist conditions where it may re-bloom in fall.

Persicaria affinis Border Jewel \$8

Ground cover plant for shade or part shade. Pink to rust-red flowers all summer. 4 - 6" foliage turns bright red in fall. Flowers 6 - 12".

Persicaria amplexicaulis Firetail (Speciosa) \$8

4' with crimson-scarlet spikes that bloom June-Sept. over large dark green leaves. Prefers light shade.

Persicaria polymorpha \$8

Very bold clump-forming plants covered with showy loose plumes of creamy-white flowers from early summer to fall, similar to those of *Aruncus dioicus*. Tolerates heat, humidity and drought. Best in sun to part shade in moist area. Good specimen plant at 4-6' tall.

Genus: Petasites Zones 4 to 9

Petasites hybridus Ex Dutch \$11

This hybrid from Holland (Ex Dutch) has large leaves and is a fast spreader, blooming in March and April before the leaves emerge.

Genus: Phlox Zones 3 to 8

Phlox maculata Natascha \$8

Bi-color flowers of pink and white on plants to 34". June-Aug.

Phlox paniculata Blue Paradise \$8

Blue with a dark eye on plants to 40". July-Aug.

Phlox paniculata David \$8

This highly mildew resistant cultivar has wonderfully fragrant flowers. One of the nicest whites. Selected by the Perennial Plant Association as 'Plant of the Year' for 2002. 42".

Phlox paniculata Laura \$8

36" plants bear deep purplish-blue fragrant flowers.

Phlox paniculata Lilac Flame PP11802 \$8

Another of the dwarf Flame series, this selection has lovely lilac-purple flowers with white centers - a lot like a mini-Laura. 12".

Phlox paniculata Little Princess PP13742 \$8

We're always on the lookout for the shorter garden Phlox, which are in great demand. This 20" charmer is a profuse bloomer having true pink flowers with a white eye-zones.

Phlox paniculata Nicky \$8

36-48" plants with nice deep purple flowers. Mildew resistant.

Phlox paniculata Orange Perfection \$8

Orange fragrant flowers in July-Aug. 36".

Phlox paniculata Red Magic \$8

We are trying some new red Phlox this year to see which is the best and to get a handle on all the versions of red that exist. We haven't seen this one yet, but from the photos, it looks like it's going to be a dark rose-red. Said to be mildew resistant, too. No white flecking in the petals like some of the other reds. 28".

Phlox paniculata Red Riding Hood \$8

Nice cherry red flowers on a 22" plant that is sure to find a spot in many gardens.

Phlox paniculata Robert Poore \$7

Purple flower heads on mildew resistant foliage on 4-5' stems.

Genus: Physostegia	Zones 3 to 9	 	
Physostegia virginiana Bouquet Rose			\$8
Rose pink flowers on dense terminal clusters to 3' in Aug.-Sept.			
Physostegia virginiana Red Beauty			\$8
3' rose lavender spikes in summer.			
Genus: Polemonium	Zones 3 to 7	 	
Polemonium boreale Heavenly Habit			\$8
Glossy leaves and large blue flowers with yellow halo and white eye in early summer. Compact habit to 12".			
Genus: Polygonatum	Zones 4 to 8	 	
Polygonatum biflorum			\$8
A lovely native species characterized by its graceful arching stems. Greenish white bells hang from leaf axils, often 2 bells per axil, in May-June. Stalks 18-36".			
Polygonatum odoratum Variegatum			\$9
Variegated form of Solomon's Seal. Leaves narrowly edged with creamy-white. We're not sure if this is actually P. odoratum 'Variegatum' or P. falcatum 'Variegatum' or if there is any difference. Some of the literature lists the two as separate species; other sources say they are synonyms. They generally seem to be used interchangeably. If you have any personal experience comparing the two, we'd like to hear from you.			
Genus: Polygonum	Zones 4 to 8		
Polygonum aubertii			\$11
We're bringing the Silver Lace Vine back in limited quantities after having it out of our catalog for several years, since some of you have wanted to get this plant and not found it elsewhere. The 20 - 30' vines will be profusely covered with white flowers. Be sure to read the Genus description also. We don't want you to buy this plant if you don't have the right location for it.			
Genus: Pulsatilla	Zones 4 to 8		
Pulsatilla vulgaris			\$8
Violet-purple flowers on the species plant. 8 - 10".			
Pulsatilla vulgaris Papageno			\$8
Fringed semi-double flowers with a color range of white-cream tones, bright pink to dark red and light blue to violet. 12" plants. Often bloom single the first year.			
Pulsatilla vulgaris Rote Glocke			\$8
This is the "Red Bells" pasque flower. As with the others, it blooms around easter time. Quite early for most flowers in our zone 4 garden. Some sources say zone 4 for this cultivar and some say zone 5. We have had reliable hardiness in our gardens for other P. vulgaris species, so we suspect that it will do well in zone 4 except if there is an extra harsh winter. The characteristic that gives this cultivar its name is, of course, the fact that it has bright red blossoms that resemble an upward facing bell as they open. Prefers drier soil, so it's great for the rock garden.			
Pulsatilla grandis			\$8
The grandis species is the largest flowering of the Pasque flowers, with lilac-pink flowers 3" across on 12" plants. We list it as zone 5 hardy, but many sources list it as zone 4. We haven't trialed it so we go for the more conservative estimate.			
Genus: Rodgersia	Zones 4 to 7	 	
Rodgersia pinnata Hercules			\$16
A newer Rodgersia that makes an excellent specimen plant. Crisp, bold, glossy green and bronze-tinged foliage. Pink flowers in mid summer. 36-42".			
Genus: Rudbeckia	Zones 3 to 10		
Rudbeckia fulgida Goldsturm			\$7
Deep yellow daisy-like flowers with black cones on multiple branching stems to 24" in July-Sept. PPA Perennial Plant of the Year in 1999. 'Goldsturm' continues to be one of the best all-around perennials and it is featured on the "Perennial Superstars" page in the color section of this catalog.			
Rudbeckia laciniata Goldquelle			\$8
2-3' stalks bear shaggy double yellow flowers all summer. Double, yes, but as we say, a bit shaggy and not as "perfect" as 'Maya'.			
Rudbeckia maxima			\$8
Big bold silver-blue leaves on erect upright stems 6-8' topped with light yellow flowers and very large brown cones.			

Rudbeckia nitida Herbstsonne (Autumn Sun) \$8

One of the most popular of the Rudbeckia genus, 'Herbstsonne' is also one of the tallest, reaching 7' without much trouble. The tall stalks are covered with yellow daisy-like blooms all summer. And, another big plus, it doesn't need staking under normal conditions.

Genus: Salvia Zone: Varies by cultivar 

Salvia nemorosa Blue Hill (Blauhuegel) \$8

Reliable, compact selection producing spikes of sky blue flowers in summer. Long flowering on 16-20" stems.

Salvia nemorosa Caradonna \$8

This newer selection from Germany stands tall at 24-30" and stands out with glowing purple stems that hold their rose-purple flowers for a long time.

Salvia nemorosa East Friesland (Ostfriesland) \$8

Dark Violet-purple flowers on 1 1/2" diameter spikes from June to July. Lots of 18" flower stems make it look almost like a small shrub. Nice foliage, too.

Salvia nemorosa Lubeca \$8

Violet-blue long-blooming flowers. 18-24".

Salvia nemorosa Marcus (Haeumanarc) PPAF \$9

From Germany comes this dainty new dwarf Salvia. Perfect for containers or the rock garden. Also great for edging. Dark purple flowers on stems reaching only 8".

Salvia verticillata Purple Rain \$8

Long arching stems of purplish buds open to a smoky purple throughout the summer. Very long flowering; attracts hummingbirds. 18-24".

Salvia pratensis Eveline PP14905 \$8

There are a lot of Salvias out there, so we don't add new ones often, but 'Eveline' is different enough to merit a try. First, its 24" stems are loaded with flowers of two-tone pink and soft purple. Second, it reblooms if cut back. Finally, it is a strong upright grower and does well in containers. A single plant will have 25 - 30 flower stems after a couple of years. A fantastic new find!

Genus: Sanguisorba Zones 4 to 8  

Sanguisorba tenuifolia \$8

This species is known a "giant burnet" and can reach a height of 48" - 60", so it makes a great back of the border plant with a rich dark maroon bloom with the characteristic tail-like flowers on long stems. Flowers are somewhat cucumber-scented over nice dark green foliage.

Genus: Sedum Zone: Varies by cultivar 

Sedum Autumn Fire \$8

Sedum 'Autumn Joy' has been around forever and we love it. But it does tend to get lanky and can flop over. A new cultivar, 'Autumn Fire' has a tighter growth habit which largely eliminates the flopping. Developed in Quebec, 'Autumn Fire' also has a longer-lasting, more intensely colored flower head.

Sedum Bertram Anderson \$8

Compact, low groundcover with deep purple flattened oval leaves. Mauve pink flowers.

Sedum Birthday Party PPAF \$9

Compact habit, doesn't open up. Large flower heads, deep rose pink purple brown tinted leaves.

Sedum Frosty Morn \$7

An exciting Sedum from Japan. Upright growth habit and a wide white border around each leaf. Late summer flowers are white in warm climates, pink in cooler regions. May tend to lose its variegation over time.

Sedum John Creech \$8

One of the best groundcover Sedums. Only 2" tall with pink flowers in June.

Sedum Lime Zinger PPAF \$8

Apple green leaves edged in cherry red growing in a very tight groundcovering mat. Pink flowers.

Sedum Mr Goodbud PP17671 \$9

Large 5-6in clusters of vibrant purple pink flowers on purple red stems. Compact upright clump of deep blue green serrated foliage.

Sedum Thundercloud PPAF \$8

An Intrinsic Perennial Gardens introduction! Unique pointed grey green foliage emerges in spring on strongly mounding domes. Slowly expanding to 10-12" mounds with white spectabile type flowers the end of August into September. Full sun; well drained soil.

Sedum spectabile Brilliant \$8

Large red flower heads in Aug.-Sept. over broad blue-green foliage. 12-15".

Sedum spectabile Hot Stuff	PP17212	\$10
A nice compact sedum, being about 1/3 shorter than 'Brilliant', yet with brighter pink flowers. If your tall Sedums tend to fall apart mid-season, try this more compact variety. 14" clumps, 10" foliage, 12" flowers height. We've rated this plant's hardiness to zone 3 based on the fact that the spectabile species tends to be hardy. However, it may turn out that it is hardy only to zone 4.		
Sedum spurium Dragon's Blood		\$8
Bronze foliage covered with brilliant red flowers June-Aug. 3-4".		
Sedum spurium Fulda Glow		\$7
Foliage stays bronze red all season. Rose-red flowers. 3-4".		
Sedum spurium Ruby Mantle		\$7
A nice red-green carpet forming Sedum with ruby flowers June-July. 4-6".		
Sedum spurium Tricolor		\$8
Attractive red, green and white foliage. Ht. 2". Smaller than the type.		
Sedum reflexum Blue Spruce		\$8
Blue foliage with bright yellow flowers in summer. Popular ground cover.		
Sedum cauticola		\$8
Blue foliage of rounded leaves on trailing stems. Pink flowers in late summer. We've used this one in containers and it does very well, flowing out over the edge with an excellent foliage color.		
Sedum floriferum Oracle		\$7
Large golden flower custers above gray blue foliage.		
Sedum kantschaticum Variegatum		\$8
Pale green leaves tinged with white and pink. Orange-yellow flowers in early summer. 4-5".		
Sedum album		\$8
This "white stonecrop" is one of the low-growing, spreading varieties. Works well in rock gardens or hanging over stone walls. Fleshy tiny leaves alternate along trailing stems. The leaves resemble tiny jelly beans. Foliage turns red to bronze as cold weather arrives. White flowers in mid summer.		
Sedum grisbachii		\$7
Tiny plant with distinctive translucent bump at the end of each leaf. Turns deep red in summer with lots of striking yellow flowers.		
Sedum forsterianum ssp. Elegans Silver Stone		\$8
Low maintenance groundcover, with tight clump of blue green needle like foliage becomes flushed with pinkish purple in cool weather. Starry yellow flowers.		
Sedum linear Variegatum		\$7
Creeping stems with thin narrow leaves. Cream-colored leaves. Hardy to 10 degrees. Yellow blossoms.		
Sedum serpentine		\$7
Russet red leaves with tortuous and creeping stems. Pink flowers.		
Sedum japonicum Senanense		\$7
Nice bright color with trailing stems makes this a very attractive plant. Hardy. 2" tall. Flowers yellow, with red keel.		
Sedum rupestre Angelina		\$9
New this year from PlantHaven is this low growing ground cover Sedum with bright golden yellow needle-like leaves. In fall, as the weather cools, the tips of the leaves turn to reddish orange. This is an excellent new color in Sedums. Tiny yellow flowers in mid-summer. 3 - 5" tall. Does well in hanging baskets and containers as shown in the color section of this catalog.		

Genus: Sempervivum Zones 3 to 8 

Sempervivum Atropurpureum \$8

The cultivar name says it all: Lots of purple in the rosettes, especially in spring and fall with colder weather. Some grayish greens deeper into the rosettes. The ones we have look mostly purple most of the time.

Sempervivum Blue Boy \$8

This is a really pretty Sempervivum with bluish green rosettes with pink to red tips. The flush of pink may be more lilac and may go further into the rosette depending on sun exposure and growing conditions. Forms a medium-sized rosette.

Sempervivum Cobweb \$7

Small whitish rosettes with very good webbing.

Sempervivum Gambol \$7

Very colorful with red to pink leaves. The center of the rosette may be light green or the rose color may carry throughout. Definitely a good addition to the rock garden. Medium growth rate.

Sempervivum Giuseppii	\$8
Medium green color. Very tight heads, small to medium in size.	
Sempervivum Lively Bug	\$7
Forms a more open rosette of leaves that are green on the front and red on the back, with the red wrapping around the leaf, especially as the leaves mature. Leaves are heavily fringed and tufted to the extent that it looks like webbing, but it's not actually webbing like the arachnoideum species produces.	
Sempervivum Maria Laach	\$7
Light green centers to the rosettes in the summer, but they are set off by dark mahogany, almost black tips and backs all season. Turns all dark as cold weather approaches, so it's dark mahogany in the spring, lightening up over the summer, then turning dark again when cold weather returns. It's a real eye-catcher, so put it in a spot where people can get close up.	
Sempervivum Moore Honey	\$8
Very nice coloration with the center of the rosette being limey green set off by orange-red tips with more color as they mature.	
Sempervivum Othello	\$7
Large strong red.	
Sempervivum Red Beauty	\$8
Medium heads, fairly open with gray-green foliage tipped blood red.	
Sempervivum Rose Queen	\$7
Lots of rosey color starting at the base of the rosettes and spreading up into the leaves, which are otherwise light gray-green.	
Sempervivum Rosie	\$7
Green hairy leaves that become rose pink in fall through early spring.	
Sempervivum Silverine	\$8
Rosettes of sharply pointed silvery green leaves flushed redish purple at the base. Color will vary each season. Deep pink flowers.	
Sempervivum Sioux	\$8
This is one of my favorites for color. Deep burgundy tips to the rosettes, with leaves becoming almost totally colored as they mature. The bright green centers make this a real standout.	
Sempervivum Twilight Blues	\$8
Large olive green shaded lavender leaves with purple tips.	
Sempervivum Villosum	\$8
Light-green, soft downey look. Leaves edged with furry hairs.	
Sempervivum arachnoideum Martin #1	\$8
Another webbed variety of Sempervivum, this one was hybridized by Martin Haberer in Germany and first released in 1983. Besides the webbing, it has light green leaves with tips and backs in red.	
Sempervivum calcareum Mrs Giuseppi	\$8
Gray blue leaves with eye catching triangular tips each with a small maroon tip. Nice rosette pattern.	

Genus: Silphium Zones 4 to 9

Silphium perfoliatum **\$8**
 Massive 6'-8' stalks of yellow flowers in July-Aug. Upper leaves wrap around the stem forming tiny cups in which dew and rain gather. Can readily self seed. If you don't want it where it seeds, be sure to pull up early, as it establishes quickly and in the fall will require digging rather than pulling.

Genus: Solidago Zones 3 to 9

Solidago Laurin **\$8**
 An outstanding choice in a dwarf selection with excellent full flower heads. Recommended for the rock garden or front of the border. 12".

Genus: Spartina Zones 3 to 8

Spartina pectinata Aureomarginata **\$8**
 4-5' drooping blades with subtle gold margins. Needs moisture. Sun to part shade.

Genus: Stachys Zones 4 to 10

Stachys byzantina Big Ears (Helene von Stein) **\$8**
 This wooly cultivar has huge leaves, twice the size of its little cousin. Good groundcover or front of the border subject. Tolerates hot weather. Clump forming. Foliage 8 - 10". Not grown for the flower, which many choose to remove.

Stachys byzantina Silver Carpet \$8

Non-flowering form of the species with smaller leaves than 'Big Ears'. 6".

Stachys monieri Hummelo \$8

Basal rosettes of textured, somewhat glossy foliage with rose-lavender spikes on sturdy stems. Summer bloom 18-20".

Stachys minor \$8

This species is much different from the common Lamb's Ears types. It has nice dark green very crinkled leaves that form a basal rosette, from which arise spikes of pinkish to purple flowers. We think it will reach 12-18" in height.

Stachys macrantha Morning Blush \$7

Scalloped dark green foliage with white and pink flushed tubular flowers. Compact and very floriferous.

Genus: Thalictrum Zones 4 to 8  

Thalictrum rochebrunianum \$9

Reddish-lilac flowers on 5' plants with glabrous foliage. Very striking.

Thalictrum flavum ssp glaucum \$9

Yellow flowers in June-July on 3 - 5' plants.

Genus: Tiarella Zones 3 to 8  

Tiarella Candy Striper PP21282 \$9

Lush green leaves with dark stippled stripe down each leaf lobe. Mounding habit, huge leaf size, pink tipped white flowers, Leaves deeply lobed.

Tiarella Sugar and Spice PP16738 \$12

This Tiarella is everything nice. Very shiny leaves, lacy in texture, with a strong center marking during summer and fall. Fragrant foamy frosted pink flowers with white interiors in spring. Clumps to 12", foliage 8", flowers 13".

Tiarella cordifolia Eco Rambling Silhouette \$9

Dark, deeply lobed leaves. Fragrant flowers with coral anthers in April and May.

Genus: Tradescantia Zones 3 to 9  

Tradescantia Blue and Gold \$9

A unique spiderwort with golden foliage set off by gentian-blue flowers. A vigorous grower that blooms a long time because it is sterile. 21".

Tradescantia Concord Grape \$8

Rich purple 1 1/2" flowers.

Tradescantia Satin Doll \$8

A more compact upright plant at 12 - 15" high with glistening satiny pink flowers.

Tradescantia Snowcap \$8

Immense flowers of purest white to 18".

Tradescantia Valour \$8

Vibrant red flowers. Very nice.

Genus: Tricyrtis Zones 4 to 8  

Tricyrtis formosana \$9

This nice toad lily blooms from August into September in part to full shade. Has the typical freckled petals of white to reddish-purple with yellowish throats. They have reddish spots all over the petals, sort of like a tiger lily. Should have medium to wet soil. Soil should not be allowed to completely dry out. We don't always have Tricyrtis in stock, so take advantage while we do.

Genus: Trillium Zones 3 to 6 

Trillium grandiflorum \$11

Also called the Wake Robin, this is the best known species. Lovely pure white flowers in good form. A must for the shady woods garden. 8 - 18".

Genus: Trollius Zones 3 to 7  

Trollius Orange Crest \$9

Reaching 22- 24", this globe flower has large light orange flowers with darker orange centers. Vigorous grower that will form a nice clump under the right conditions, which means moist soil. Also Shade tolerant.

Trollius hybrida Earliest of All				\$8
Nice yellow flowers on an early May-June bloomer to 20".				
Trollius New Moon				\$8
Large creamy yellow flowers on strong upright stems. Blooms late spring early summer.				
Genus: Vernonia	Zones 5 to 9			
Vernonia fasciculata				\$8
This tall species of ironweed can reach 4-6' and is topped with bright reddish-pink flowers that really stand out. It blooms in late summer and is very tolerant of wetter soils. If you have clay problems, you should give this one a try.				
Genus: Veronica	Zones 4 to 8	 		
Veronica austriaca Crater Lake Blue				\$7
Brilliant gentian blue flowers on 12" spikes in June.				
Veronica spicata Blue Charm				\$8
Uniform mound-shaped plants with abundant lavender-blue flowers through summer. 24".				
Veronica spicata Fairytale	PP17650			\$8
Long 7" spikes have a two-tone effect with light silver-pink flowers and dark rose stamens. Larger more bushy habit with dark green foliage, very floriferous and uniform flowering.				
Veronica spicata Red Fox (Rotfuchs)				\$7
Bright rose spikes from June-Aug. 18".				
Genus: Veronicastrum	Zones 4 to 8			
Veronicastrum virginicum Roseum				\$8
Early summer flowering with pink flowers. 3 - 6'.				
Genus: Yucca	Zones 4 to 8			
Yucca filamentosa				\$7
Strong stately spikes rise 5-6' over bright green sword-like foliage to bear creamy-white bell-shaped flowers in July-Aug.				
Yucca filamentosa Bright Edge				\$8
Attractive band of gold edging the dark green leaves. Creamy white pendulous flowers. 4-5'.				
Yucca filamentosa Color Guard				\$8
Foliage white and cream on the inside and edged with green, 4'. Six foot stalks of white flowers in spring.				
Yucca filamentosa Golden Sword				\$12
Green leaves with golden centers. White flowers on 4' spikes.
